

Title:	eSATA Drive Settings				
Date:	5/2/2012	Version:	1.0	Pages	1
Product:	Hikvision DVR's				
Action Required:	Information Only				

- eSATA can be used as Export or Record/Capture; users must set the desired mode in the DVR's menu. Device reboot is required when mode is changed.
- Every time eSATA connect mode is changed, users need to format eSATA in the DVR's menu to make it available.
- When eSATA is in Record/Capture mode, it does not support hot-swap. Device reboot is required each time users plug in/out.
- When eSATA is in Export mode, it supports hot-swap.

Note: eSATA is currently supported up to a maximum of 2 Tb.

Recommended eSATA models:

VANTEC NexStar3 eSATA (Additional hard drives),
G-Tech G-RAID mini (1TB)
miniEPICa Series EP-D501-AA

Note: For more information on eSATA operation, please refer to DVR user's manual.
